Annual Budget Including Fees & Charges

STATEMENT OF REVENUE POLICY

Council has reviewed its Revenue Policy for 2019/20 with the main features being:

- 1. An increase in the consumption charge of 6% from \$2.92 to \$3.10 per kilolitre in accordance with its adopted policy to permit funding of its capital works program.
- 2. Availability charges will increase by 2% and applied in accordance with the Flow Capacity Factors outlined below.
- 3. Development contributions have been increased by 1.7% per ET in accordance with the adopted Development Servicing Plan. (Movement is based on the Sydney CPI index for 12 months to 31 December, 2018)
- 4. Section 603 Certificate fees being a Statutory Fee have been increased to \$85.00 in line with the Office of Local Government determination.
- 5. Service connection fees and private works have been increased by 6%.
- 6. Two new administrative fees have been added being a \$2.50 charge for copy of accounts where in excess of a single account (most recent account) is requested and a \$65.00 per hour search fee where information is requested that involves resources and time being expended by Council staff.

Availability charges will increase from \$235 to \$240 pa (\$58.75 to \$60.00 per quarter). It should be noted that Council will review availability charges annually in accordance with the Best Practice Water Pricing guidelines. This will result in availability charges changing annually rather than being fixed for a number of years between amendments. The aim being to bring more pricing stability for consumers in accordance with the Best Practice guidelines.

Council is also evaluating measures that can be used to offset its energy usage and these are currently under investigation.

Council is aware of the needs of its consumers and provides a reliable and high quality water supply. Council is also aware of ensuring that its pricing policies must permit the renewal and upgrading of its water network infrastructure so that consumers expectations are met.

Council has embraced Best Practice Pricing of Local Water Utility services as outlined in the Department of Industry - Water Best Practice Management of Water Supply and Sewerage Guidelines. In summary, the following pricing regime exists for Central Tablelands Water:

- 1. A two part pricing policy of an availability (access) charge, determined on the diameter of the meter, and a straight line consumption charge,
- 2. There are no non-residential cross subsidies.
- 3. Water accounts are rendered quarterly.
- 4. Development Service Charges are set in accord with methodology set down in accord with the guidelines.

AVAILABILITY (ACCESS) CHARGES

The availability charge is calculated by multiplying the charge for a standard 20mm connection by the flow capacity factor (FCF) listed in the Flow Capacity Table below.

FLOW CAPACITY TABLE							
Diameter of Water Service	20mm	25mm	32mm	40mm	50mm	80mm	100mm
Flow Capacity Factor	1.00	1.5625	2.56	4.00	6.25	16.00	25.00

The FCF is a factor based upon relative meter size and measures the load that can be placed on the system by that service size. (i.e. large services place greater loads on the system)

DEVELOPER CHARGES

Incorporated in Council's Development Servicing Plan is the calculated developer charge per Equivalent Tenement (ET) levied on all new developments, or additions/changes to existing developments, supplied from the Lake Rowlands Supply area.

THE SECTION 64 DEVELOPER CHARGE FOR 2019/2020 IS SET AT \$9,334.00 PER ET.

Council resolved that the determination of an ET would be in accordance with the Section 64 Determination of Equivalent Tenement Guidelines, published by the NSW Water Directorate and that the charge would be indexed on 1 July each year in accordance with the change in the Consumer Price Index for Sydney in the preceding 12 months to December. The CPI is 1.7% for the year ended December 2018.

It is important to note that blocks exceeding 2000m2 in size are considered to be defined in the guidelines to exceed 1 ET.

Council has also adopted a capital contribution charge for developments on existing vacant unconnected land, not subject to subdivision (in-fill blocks), within all towns and villages, with the exception of Quandialla. This charge would also be indexed on 1 July each year in accordance with the change in the Consumer Price Index for Sydney in the preceding 12 months to December. The capital contribution charge on existing vacant unconnected land for 2019/2020 is \$4,334.00 per ET.

The capital contribution charge for all vacant unbuilt upon land within the existing village of Quandialla remains in accordance with the adopted fees and charges for 2019/2020. The charge is calculated by reference to the multiple of \$464 per year or part year since the network construction year of 2001/02.

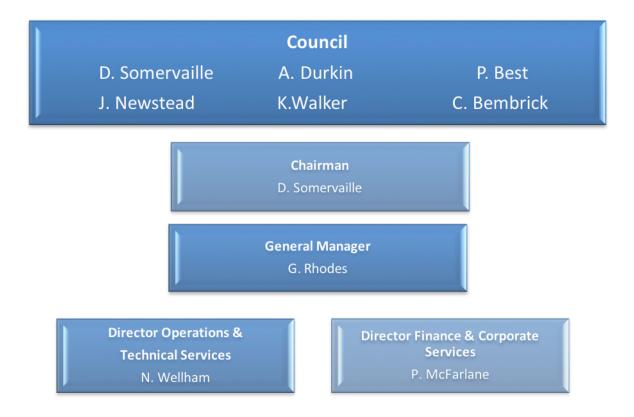

ESTIMATED INCOME AND EXPENDITURE

Detailed estimates of Council's income and Expenditure for 2019/2020 are in the attached *Appendix*.

REVENUE POLICY INCLUDING FEES AND CHARGES

Council's Revenue Policy is included in the attached *Appendix*.

ORGANISATIONAL STRUCTURE

Council has 3 constituent Councils being the shires of Weddin, Blayney and Cabonne. These shires incorporate Council's supply region, however bulk water is also supplied to Cowra Shire Council.
