INFORMATION REGARDING WATER SERVICES

All work executed and all pipes and fittings to be connected to the Council's water supply must be strictly in accordance with the provisions of the Local Government (Water, Sewerage and Drainage) Regulation 1993, as well as complying with both the Water Supply Code and Council's requirements.

All tapping of the main shall be made by suitably qualified and authorised employees of Council. No connection shall be made to Council's mains without express permission.

A person who is not a licensed water plumber shall not fit, alter or interfere in any way with water pipes and fittings used or intended or adapted to be used on any premises in connection with the supply of the water of the Council.

The metering point shall be within the premises, in a convenient and accessible position and as near as practicable to the alignment. The metering point must be kept clear and accessible at all times.

Council will install an appropriate backflow prevention device on information supplied on this form. The customer is responsible for the ongoing maintenance, annual inspection and testing by a suitable qualified plumber and the eventual replacement of the backflow prevention device. The results of annual inspections and testing must be made available to Council upon request.

Onsite storage equal to consumption at one peak day's demand must be provided for all connections with demand above 20,000 litres per day.

There shall be a separate 20mm service and meter for each tenement.

Connections will not be made until all fees and charges due and arrears of fees and charges have been paid. Additionally, connection will only be made once all connections costs have been paid.

Site location:

Please show lot, street and preferred location (mark X) together with nearest cross street.
